Web Scraping With Node.js

VOLUNTEERING

Founder | WeHelp

WeHelp is a non-profit charity initiative, that aimed both medical personnel and local businesses that have been negatively affected due to COVID-19 virus. Our main goal was to raised money from donors, bought hot meals from local businesses and send those hot meals to the medical personnel at the hospitals.

WORK EXPERIENCE

Full Stack Engineer | Appgrade
Jan 2023 - Present

- Spearheaded the development and implementation of both client-side and server-side solutions, leveraging expertise in React Native Web, TypeScript, and Nest.js within the Appgrade ecosystem.
- Responsible of infrastructure creation and maintenance, ensuring seamless operations and scalability. Played a key role in ongoing optimization, refactoring code for improved performance and maintainability.
- Integrated CRM systems expertise in the development of the server side, effectively managing data flow to and from CRM through Azure.
- Developed app integrations with REST and other APIs, including Azure services.
- Responsible of platform architecture, design patterns and development of micro-services, controllers, repositories, and more on the server side.

Full Stack Engineer | StorrSoft
Nov 2021 - Jan 2023

- Designed and developed complex features and large-scale components for both client and server sides.
- Led architecture, design patterns, and UI development for key features.
- Managed CRM data efficiently through XML queries, optimizing data retrieval.
- Developed app integrations with REST and other APIs, including Azure services.
- Improved code quality for readability and maintainability, overseeing timely updates, upgrades, and bug fixes.
- Planned, wrote, and debugged web apps and software with precision.
- **Tech Stack – React, React Native, TypeScript, Node.js, Nest.js, HTML5, CSS3, XML**
